Six to Six When Time Was Up-The West Point Eleven Beaten, 12 to 4, by the Naval Cadets-Princeton and Pennsylvania.

Boston, Nov. 26 .- Six to six was the score of the great foot-ball game between the Harvard and Yale freshmen elevens on the Jarvis field, Cambridge, this aftenoon. The day was a perfect one for foot-ball, and the largest crowd that ever witnessed a freehman game turned out to see the spirited and well-played contest. As early as 12 o'clock the people began to arrive and at 2:30, the hour announced for calling the game, every seat was taken. Fully six thousand were on the grounds, while several thousand were satisfied even with the opportunity of watching the game from the surrounding streets and house-tops. The Harvard players, although disappointed at not securing a victory, seemed satisfied at the showing they had made, while Yale was more than jubilant at tying the score when defeat stared them in the face. The record of the Yale-Harvard freshman contests now stands: Harvard won 8, Yale won 3, with b ties. The line-up was as follows:

Yale, '96. Position, Harvard, '96. .left-End-right ..... A. Brewer rmstrong...left—Tackle—right.....left—Guard—right.....left—Guard—right..... Hickok .....right—Guard—left ......Worden
Frindle .....right—Tackle—left ......Shea
Greenway ....right—End—left .....Foster
Johnston .....Quarter-back ......Fairebild .....Full-back.....Fennessy

Referee-Mr. Stears, of Amherst. Umpire-Mr. Mallette, of Tufts. Yale won the toss and took the ball, Harvard having the advantage of what slight wind there was. The game opened at the customary wedge, but only about two yards was netted by the wearers of the blue. Harvard got the ball, Brewer now made the "star" rush of the game, carrying the leather fully sixty yards around Greenway's end. This was done by spiendid running and through perfect interference of Fairchild and Clark. Shea now ran with the ball and won two yards between Armstrong and Sears. With the ball on Vale's twentyfive yard line Harvard could make no more headway. Arnoid at this point made a beautiful run of fifteen yards and might have scored a touch-down, but for a great tackle by Dewitt. After a series of unsuccessful rushes, and with the ball on Yale's twenty-five-yard line, Brewer tried a goal from the field. Brewer missed his mark by about twenty yards, and Yale had the ball in its possession again. It was only for a short time, however, as four downs, with only slight gains, gave the ball to Harvard, who in turn lost it on a fumble, by Russell, Mcwho in turn lost it on a fumble, by Russell, Mc-Crea breaking through and falling on the ball. Again Yale lost the leather on four downs, and this time Harvard was determined to make a touch-down. On rushes by Brewer, Fennessy and Arnold the ball was steadily advanced and with only three yards more to make, Arnold was forced over the line for a touchdown, amid great cheering. Brewer kicked a goal. Time, 35 minutes. Brewer made a long run of firteen yards, getting through the line, and the ball was on Harvard's ten-yard line, where Yalo failed to make any more gains, the ball going to Harvard on four downs. A minute later and the first half was over with a score:

At the opening of the second half, at 3:50, Yale looked a bit anxious as the Harvard players paired off for the flying wedge, which was worked so successfully against the 'Varsity gieven at Springfield last Saturday, Brewer, by a crise-cross, ran with the ball for pearly forty yards before he was downed, and the New Haven players were thunder-struck. But Yale is never beaten, and by plucky playing kept Harvard from advancing the ball much further. Fairchild was injured in a scrimmage, but resumed playing. It was now Yale's ball on four downs. Yale falled to keep it long. and after a run of two yards by Dewitt the ball went to Harvard on four downs. Brewer thought it advisable to kick, after he had tried in vain to buck the center, the result being a fair catch for Thorne on Yale's sixty-yard line. The ball went first to Harvard and then to Yale, until the lattirst to Harvard and then to Yale, until the latter finally, by better team work, began to advance the bail toward Harvard's goal. Dewitt distinguished himself by making the cleanest rush of the game—that is to say, as far as Yale was concerned. It was a magnificent run of ully thirty yards, and resulted in Yale having the ball within two yards of the Harvard goal. Dewitt dodged Foster, Shea, and lastly the only Brewer. Yale scored a touchdown a minute later, De Witt being pushed across the line. Hickok kicked a goal and the score was tied. Yale's shouters were few, but hearty appliance was the result of the touchbearty applause was the result of the touch-down, and the substitutes who had followed the ball along the side line went wild with joy. Only fifteen minutes remained to be played, in which time Harvard failed to score, and the ball was in the middle of the field when time was called. This left the final score: Harvard, 6; Yale, 6.

Harvard, 6; Yale, 0.

Naval Cadets Boat the West Pointers. WEST POINT, N. Y., Nov. 26 .- It was the army against the navy to-day. For two hours and a half the devotees of Mars struggled fiercely with the followers of Neptune for supremacy on the foot-ball field. The sea-dogs won the day and proudly carried off the pennant. It was a close fight and the victory was hard earned. The naval cadets scored 12 and the military cadets 4. It was a perfect day, and five thousand people assembled at the field in front of the barracks at the United States Military Academy to see the sport. The Annapolis team reached West Point by a special train this morning, and were welcomed by the cadets and escorted to the barracks. A large number of the officers of the army and navy also arrived. and a salute was fired in honor of the distinguished visitors. S. V. Coffin, of Wesleyan University, was referee, and Laurie T. Bliss, of Yale, um-

pire. Time was called at 2 o'clock. The Annapolis forced the West Pointers to play the first inning with the sun in their eyes. As the men lined up it was apparent that the future midshipmen had a decided advantage in the coint of weight, and this advantage was repeatedly made manifest during the game. The play had been so even that when the first inning was half over the ball was in almost the exact center of the field. Long punts by Bagioy and Pattison and short rushes kept honors about even. At the end of the first half the ball was on West Point's thirty-yard line, and neither had scored. Although the ball had been in the West Pointers' he cheering of the home-supporters bad been much more continuous and rigorous than that of the naval cohorts, and the result was shown in the aggressive playing of the local team at the opening of the second inn-ing. It had the kick off, but found a wedge, and by a series of the most determined rushes fairly forced the pigskin down to the Annapolis tenas though a touch-down was only a matter of time, and the home guard went mad with en-thusiasm. The visiting team, however, resisted bitterly at this point that their opponents failed to gain the necessary five yards in four downs, and hence were compelled to forfeit the ball to Annapolis.

The tide had turned, and from this time on Annapolis was a decided favorite. Bagley's punt got his side out of danger, and Hampton, who caught the ball and tried to run with it, had his to leave the field. Carlon took his place. The ne. Another rush and Izard, one of the naval ine and made a touch-down, thus scoring the first point of the game. The people of the west side of the field went wild with joy, and when Basiey readily kicked the goal these old sea dogs, resplendent in gold lace, capered about and shouted as though suddenly bereit of reason.

The score was now 6 to 0, in layor of the navy. West Point went in to do or die. Sharp rushes and the prettiest run of the game by Timberiake for thirty-five yards carried the ball to Annapo-lis's goal-line and Carson managed to get through and score a touch-down for the home team. It was now West Point's turn to shout and caper, and shout and caper it did. The try for a goal was a very hard one, and Timberlake missed it by three or four yards. Hence the score was still in Annapolis's favor—6 to 4. Annapolis resumed play with a series of rushes, in one of which B. Ames, the left rush on the West Point team, was disabled and retired. Starting from the thirty-five-yard line, McCormick, of Annapolis, carried the ball to the fifteen-yard line. Izard then advanced it by ten yards, and by skirmishe it was burried across the goal line. Johnson made the touch-down right between the gos hosts. Bagley kicked goal without trouble, and the score was 12 to 4 in favor of Annapolis. By orce of desperation West Front force of desperation West Foint rushed the bail to within eight yards of Annapolis's goal. A touch-down was all but certain when time was called and the game was ended.

PRINCETON, N. J., Nov. 26.-The impression seems to be generally entertained which compels Yale to play with the Uni- | made known.

versity of Pennsylvania next Thanksgiving day. The clause in question reads as

The championship series shall consist of one game with each college, and shall be played upon grounds mutually agreed upon, the two leading colleges of the preceding year shall play in or

As can readily be seen this refers in no way to the Thanksgiving game, which will be played next year just as it has been for the past fifteen years.

Watkins Will Manage the Browns. Special to the Indianapolis Journal. Sr. Louis, Nov. 26 .- The Brown Stockings will be managed next season by W. H. Watkins, who piloted the Detroit team to the world's championship in 1887. He closed a contract with Mr. Von der Ahe to-day, and left for the East to-night. He is to bave supreme control of the team, and his word will be law.

Indianapolis, 8; Franklio, 0.

Special to the Indianapolis Journal. FRANKLIN, Ind., Nov. 26 -The Indianapolis High-school and the Franklin College football teams played an interesting game on the coilege campus this afternoon, which resulted in a score of 8 to 0 in favor of Indianapolis. A. E. Somerville, of Butler University, umpired for the vis itors, and W. P. Garshwiler for the home team was won for Indianapolis half-back, Henry Bushman made the only two touch-downs of the game. Bushman and Stet Parker, the center rush, were both slightly injured, but no one else was hurt. The Franklin boys all played well, but could not withstand Bushman, the best plays on this side being made by Caldwell, Davis and Van Vleet. The members of the home team claim there were several "ringers" run in on them.

THEY'RE "ON TO" GROVER

Few Ducks Flow Near the Wild-Fowl-Slaver of Hog Island Y sterday.

EXMORE, Va. Nov. 26 .- The steam yacht Sunshine, which conveyed President-elect Cleveland and party to the blinds this morning, returned shortly after noon. The day was almost perfect, but the ducks were flying only in moderate numbers, and though the sport was excellent, the number of wild fowl bagged was not large. Upon leaving the vacht Mr. Cleveland was placed in charge of George Doughty, who served him on yesterday. The small boat which Mr. Cleveland occupied was to-day fitted up with a triangular oil stove having three burners by which the Presidentelect could warm his hands and feet. This arrangement considerably mitigated the inconvenience which would otherwise have been experienced from the cold. The same blinds were used as yesterday. The yacht steamed around in a circle for the purpose of beating in game. The entire party passed an enjoyable forenoon's sport, notwithstanding the comparative scarcity of When the Sunshine was leaving her land-

ing Captain Johnson, in charge of the United States life-saving crew, caused the stars and stripes to be run up on the station. The little party on the Sunshine responded by raising the national emblem. Mr. Cleveland assisting in pulling up the

The little island church has been brightened up for the service to-morrow morning. at which Mr. Cleveland is expected to be present. The exercises will begin at 11 o'clock. The little house of worship is simple frame structure, with a capacity for seating 150 persons. The plain wooden pews are painted white, with brown striping. The walls and ceiling are newly whitewashed. The pulpit consists of a marble-top table upon a small raised plattorm, enrrounded by a railing. An organ is used in the services. Miss Florence Hudson, will officiate to-morrow

The President-elect and party are in excellent health, and are fully enjoying the rest and quiet which is afforded them on Broadwater (Hog) island. No unusual ineident worthy of note occurred during the day, It is understood this evening that Mr. Cleveland will extend his stay upon the island, probably remaining until the latter part of next week.

EXPLODED IN A CLOUD.

Dyrenforth Lets Loose Une of His Rain-Producers, ant a Shower Follows.

SAN ANTONIO, Tex., Nov. 26,-The experiments at rain-making which were begin here yesterday afternoon by General Dyrenforth and party, were continued to-day, The experiments, while not as satisfactory as they might have been, were sufficient to prove, it is said, that their theory of producing rain is in the main a correct one.

In the southeastern and western portions of the sky there were banks of thunder-clouds piled up. By 9 o'clock, however, the heavens were cleared and the moon and stars shone brightly. There were eight hydrogen-oxygen balloons sent up during the night at intervals of about every fifteen minutes. These balloons rose to a height of from 1,000 to 1,500 feet. and then exploded with terrific force, the concussion being felt for several inties around. The bank of clouds in the southeastern horizon began to move upward by 11 o'clock, being propelled by a strong wind from that quarter, and the heavens were soon overcast. was 12:40 o'clock when a particularly ominous looking cloud came up and was soon directly overhead. One of the serial monsters was let go with a fuse timed at two minutes. The balloon contained one thousand cubic feet of hydrogenoxygen and rose almost perpendicularly to a height of three thousand feet, when it exploded in the very center of the cloud. A slight sprinkling rain had begnn to fall a few minutes before, but the balloon's expiosion was followed by a drenching downpour which, however, lasted but a few minutes, when a drizzle set in and was kept upuntil 4 o'clock this morning. There was in addition to the balloons about four thousand pounds of reselyte exploded on the ground and tifteen shells in the air. The wind during the entire time the experiments were in progress was blowing a gale from the southwest, and it has never been known to rain here before when the wind was from that direction. The old inhabitants give General Dyrenforth the credit for the showers last night. Tuesday arrangements will be completed for a more extensive and thorough test.

Sab-Marine Boat Tested.

CHICAGO, Nov. 26.-George C. Baker's famous sub-marine boat was informally tested in Lake Michigan, off South Chicago to-day, in the presence of two members of the torp-do board of the United States navy. The cigar-shaped vessel was taken down the Calumet river and a mile into the lake. Mr. Baker and the two officials, neither of whom would permit the use of his name, witnessed the trial from the tug Thomas McCarthy. The electrician, and John Ree, engineer, were the only persons aboard the sub-marine boat. At the first trial the boat would not sink, as some of the machinery, which was removed before the journey from Detroit legan, was not replaced, making the craft more buoyant than when it was tried at Detroit. The party returned that there is a clause in the constitution of the Intercollegiate Foot-ball Association successful, but whether wholly so was not

WEDDED TO YELLOW METAL

None of the European Powers Said to Favor the Free Coinage of Silver.

Several Rumors in Circulation Regarding Their Attitude-London Workingmen Beginning to Feel the Effects of Pauper Labor.

THE BRUSSELS CONFERENCE,

England and the Continental Powers Reported to Be Against the United States. Special to the Indianapolis Journal.

LONDON, Nov. 26 .- In the capitals of the continental powers only slight interest is manifested towards the Brussels conference. Austria and Germany are, like England, inclined to regard the conference as a demonstration in favor of the silver mining industry of the United States. While France, Italy and Spain occupy less negative attitudes, they have few expectations that any international understanding will be reached. In fact, not a reputable newspaper in any large capital of Europe has contemplated seriously the possibility that the propositions of the delegates of the United States will be accepted or even recommended by any other delegates to their respective governments. It was said yesterday that Mr. De Rothschild's proposals would be made public to-day, but the text of the proposals has not yet been completed. Mr. De Rothschild says to-day that they will not be seen in their final shape until Monday. The report is generally credited that the proposals contain a statement that an international syndicate should be formed to buy silver until the normal value of the metal is established. Among the various rumors in circulation, to which the delegates attach importance, is one that the various European powers will yearly buy silver to the minimum amount of £5,000,000 sterling, at a price to be fixed by general agreement, on condition that the United States continues its silver pur-

an Influx of Russians and Poles. LONDON, Nov. 26.-Considerable alarm has been created among English working people by the report that the United States is about to pass a law stopping immigration altogether. It is feared that as wages are higher in England than on the continent, the tide will turn altogether in this direction. Already the influx of foreigners, and especially of Russians and Poles, willing to work for small wages, has a perceptible effect upon the labor market, and many Englishmen feel that they are out of jobs because the Russians and Poles have found work. There is also a large influx of Russian and Polish women, who are gradually drifting into employment as servants and in other domestic capacities, the lower rate of wages paid them being compensation to employers for their ignorance. Thus Englishmen and Englishwomen are being driven out of work by immigration. The only class that strictly favors free immigration is the manufacturers. They hold it over the operatives in the textile industries as a menace of what might happen if the operatives are too persistent in their demands for higher wages, or their opposition to reduced wages. As some of the newspapers are owned by or published in the interest of manufacturers, such newspapers are very chary of dealing with the subject Workingmen, however, are alive to the issue, and will press it upon their parliamentary representavives.

A Far-Reaching French Scandal. Special to the Indianapolis Journal.

LONDON, Nov. 26 .- A dispatch from Paris says that a great sensation is brewing in connection with the Panama scandal. It is claimed that a former leading Munister of State consented to be silent as to the gross frauds that were being committed because his wife received a present of 500,000 francs. The wife, soon after receiving the present, deserted her husband and went to live with one of the Panama canal officers, taking with her at the same time the 500. 000 francs. The Minister did not dare to say anything on the subject for fear of being exposed, but it is now likely that, besides the loss of his wife and the money, he will be exposed as well.

Dervishes Mowed Down with Bullets, SUAKIM, Nov. 26 .- The attack made by Dervishes on Fort Tamrin, near Tokar, was very determined. A body of cavalry cut the road leading to the fort in order to prevent reinforcements reaching the Egyptian garrison. The Dervishes then fiercely attacked the fort. The Egyptian irregulars returned a brisk fire against their enemy. Their aim was good, the Dervishes being literally mowed down as they advanced upon the fort. One hundred of the attacking party were killed and a large number wounded. Among the wounded was the leader of the attacking party. The Egyptian loss was only one

Social Evil in London Growing. Special to the Indianapohs Journal.

LONDON, Nov. 26 .- The growth of the social evil in London is causing much anxiety, not to church people alone but to the authorities, and it is a significant fact that many of the young women enlisted in the army of ontcasts are of good family and training, but take to their unhappy life, it is said, under the pressure of extreme necessity. General Booth is said to be giving particular attention to this class of outcasts, with a view of giving them an opportunity to resume an honorable career.

Gladstone Dines with the Queen. LONDON, Nov. 26.-Gladstone dined at Windsor Castle last night with the Queen, Grand Duke Sergius, of Russia, and Lord Roseberry, Minister of Foreign Affairs, Her Majesty and Mr. Gladstone discussed the question of the poet lauresteship, made vacant by the recent death of Lork Tennyson. In reply to a question asked by a correspondent, Mr. Gladstone's secretary has written a letter in which he implies that the Queen will not open Parliament in per-

Rogus Degrees for Englishmen.

LONDON, Nov. 26.-For some time past certain of the English newspapers have contained imposing advertisements stating that degrees of the National University of the State of Illinois could be had at prices ranging from ten to twenty guineas. These advertisements were signed "Professor Van Augelbach, secretary," and gave the name of Broughton Rouse, of Christ College, Cambridge University, as the English agent.

Wesleyan conference. DR. SCOTT RALLIES.

The Condition of the President's Father-in-Law Changes for the Better.

WASHINGTON, Nov. 26,-Dr. Scott, the President's father-in-law, whose condition has been extremely critical during the last few days, rallied this afternoon, and is now so much improved as to greatly encourage the hope of his family for his ultimate recovery. Mr. Blaine's Condition.

WASHINGTON, Nov. 26 .- Mr. Blaine's condition continues to excite gossip, notwithstanding the positive statements of his family and attending physicians that there is nothing seriously the matter with him. As soon as Mr. Blaine is able he will leave Washington and take up his residence at least for a time in some warmer and more even climate than this. The weather here is irritating the broachial trouble, and the doctor in charge finds more difficulty in effecting a cure. Mr. Blaine's present condition is such that in view of complications which may arise at any time, he deems it best to seek a climate that will do for him what medical skill does not appear to do here. It is understood that Pasadena, Cal., has been selected as the most suitable place for a residence, and that Mr. Blaine and his family will go there early next month, starting about the 1st proximo, and traveling by easy stages through the South and West by way of the Southern Pacific. All callers at Mr. Blaine's house this morning were informed by the attendant, "Mr. Blaine is very much better this morning." There appears to be no good reason for alarm in the case of the Several prominent officials who called at the house to-day were informed by Mrs.

Blaine that her husband was better yesterday than he was the day before, was still better to-day than he was yesterday. She asssured them that his condition had never been so serious as to alarm the family, and said she was at a loss to account for the sensational reports that had appeared in several newspapers concering the case. Her bright and cheerful manner, more than words, indicated the general encouragement she feit. Another good indication that the family feel no special alarm over the situation is the departure from this city this morning of Mr. James G. Blame, jr. He told a friend that his father was getting along very well and would probably be able to start on his contemplated trip to southern California in a few weeks. Dr. Johnson was seen this evening, and confirmed the reports of Mr. Blaine's improvement, but declined, on purely professional grounds, he said, to give any details of the case. Mr. Blaine sat up most of the day, and moved freely about his hed-room without any apparent fatigue. Dr. Johnsaid that, unless unlooked-for complica-tion appeared, he thought Mr. Blaine would be down stairs, as usual, in a few days.

Intended to Blow Up the Bank, KNOXVILLE, Tenn., Nov. 26 .- A bold attempt has been made to rob the Wantaga Bank at Johnston City. An underground mine and nitro-glycerine were to do the work. Fortunately some of the detectives exploited the plot before it reached mamade last evening and the detectives bal little trouble in laying their hands on the supposed guilty parties. They arrested four men-J. McBray, Chancey Campbell, John Orr and John Crouch-and at once consigned them to jail to await examina-

THE LATE WILLIAM H. DEAN.

He Was Prominent in Politics-Something o His Life and Family.

Wm. H. Dean, who died Friday afternoon last, at his residence, 355 South Meridian street, was quite prominent in politics at Columbus, Ind., many years ago, where, for seven successive terms, he held the office of city clerk. Mr. Dean was private secretary to the late Dillard Ricketts when that gentleman was president of the J., M. & I. The deceased was only fifty-eight years of age, but his health had been falling for several years past and was so much impaired from a complication of discases as to leave no hope for his recovery. He received a collegiate education at the Dublin College in Ireland, and afterward came to Indiana where he settled at Columbus. He had lived in Indianapolis for the past eighteen years, and had a large circle of friends who mourn his demise. Mr. Dean leaves a widow, four sons and three daughters. The f rmer are Tunis and Walter Dean, of Balti-more, and William Francis and Edward Dean, of this city. Katharine and Julia Dean and Mrs. L. M. Reaves, nee Miss Rose Dean, are the daughters. The funeral will take place to-morrow morning, at 9 o'clock, from St. John's Cathedral, where requiem high mass will be said by Father Gavisk. Tunis Dean and his sister Katie, who has been visiting in Washington for several months, arrived in the city last night. He will be remembered for his close association with Mr. Will E. English in the management of English's Opera-house for so many years. Mr. Dean is now a member of the firm of Harris, Button & Dean, controlling a circuit of theaters, with headquarters at Harris's Acad-emy of Music, in Baltimore, where Walter Dean

A FOOT-HOLD for Consumption is what you are offering, if your blood is impure. Consumption is simply Lung Scrofula. A scrofulous condition, with a slight cough or cold, is all that it needs to develop it.

But just as it depends upon the blood for its origin, so it depends upon the blood for its cure. The surest remedy for Scrofula in every form, the most effective blood-cleanser, flesh-builder, and strengthrestorer that's known to medical science, is Doctor Pierce's Golden Medical Discovery. For Consumption in all its earlier stages, and for Weak Lungs, Asthma, Severe Coughs, and all Bronchial, Throat, and Lung affections, that is the only remedy so unfailing that it can be guaranteed. If it doesn't benefit or cure, you have your money back.

No matter how long you've had Catarrh, or how severe, Dr. Sage's Remedy will effect

OVER THEIR SIGNATURES.

They Write Strong Indorsements of the Stackhouse Treatment.

Mild, Pleasant, Antiseptic, Harmless, Wholesome and Uniformly Successful in Its Results-"Now I Do Not Suffer at All," Says Little Gracie

A slight cold; A very bad cold;

A persistent, continuous cold-

And then catarrh inevitably results. Catarrh neglected invariably leads into consumption. It is one of those chronic diseases often misunderstood by the sufferer, rarely understood by the practitioner, and familiar in all its forms and complications only to a trained specialist. Dr. Stackhouse and his associate special-

ists have a system of treatment for catarrhal affections that is mild, painless, antiseptic, harmless, wholesome and uniformly successful in its results.

In thousands of caies where other systems had failed, the Stackhouse treatment has achieved the most remarkable cures. The permanency of these results has given the Stackhouse Medical Institute a reputation unique in the history of special effort

The interesting personal statements of patients published from time to time in these columns prove conclusively to the reading public that the Stackhouse treatment cures. As an instance of the benefits derived from it we present to-day the statement of MRS. LEWIS BUTTON.

Who thus writes from her suburban home at Brightwood, under date of Nov. 8: "I am very grateful to Dr. Stackhouse and associates for the good their treat-ment has done me. When I commenced

taking treatment with them I felt dull and tired all the time; had headaches and many other symptoms of catarrh; but, thanks to them and their treatment, all of these are leaving me,"

Mrs Lewis Button PERFECILY WELL.

The Forcible Statement of Thirteen-Year-Old Gracie Nieter. MAPLES, Ind., Nov. 10, 1892.

Two years ago my ear began to pain and discharge thick matter. At the same time noticed a thick discharge from both nostrils. Mamma went for a doctor and the ear got better, but always kept running until last June. My father brought me to the Stackhouse Medical Institute and I began treatment. My ear soon ceased to dis-

charge and has been well for some time. My catarrh gradually got better until now it is perfectly cured. I used to have to hawk and spit up great chunks of yellowish, greenish matter every morning before could breathe. But now I do not suffer at all and my nose and throat are perfectly well. My general health is also much improved, and I feel to-day, and have for some time past, perfectly well, and papa and mamma believe I am perfectly cured.

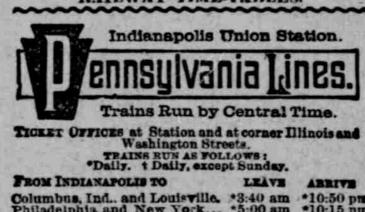

Gracie Wieter.

Treatment by mail under the system perfected by this institution proves no less effective in its results than in cases where the treatment is personally administered. Symptom blanks mailed to all applicants. Cases that have received no benefit from the treatment of others are specially solicited. All curable cases of lingering, continued or doubtful character treated No case is taken which, in the opinion of
